

SUMMARY

Computer Science graduate skilled in Machine Learning and Data Analytics. Demonstrated ability to build ML-pipelines and extract actionable insights from complex dataset and present using interactive dashboards.

SKILLS

- **Languages:** Python, SQL, C++
- **ML & Deep Learning:** TensorFlow, Keras, Scikit-learn, XGBoost, LSTM, CNN, Transfer Learning, Attention Mechanisms
- **Generative AI & NLP:** LangChain, RAG Pipelines, Vector Databases (FAISS, Pinecone), LLMs, NLP, Embeddings
- **Data & Analytics:** Pandas, NumPy, Statistical Analysis, Feature Engineering, Predictive Modeling, EDA
- **Visualization:** Tableau, Matplotlib, Seaborn, Dashboard Design
- **Tools & Practices:** Git, FastAPI, Agile / Scrum, Jupyter, VS Code

INTERNSHIP

Software Engineering Intern - Data & Analytics | [Viasat India](#) | Feb 2026 - April 2026

- Architected an end-to-end analytics pipeline ingesting multi-source data into a unified, analysis-ready customer dataset, reducing manual preparation time significantly.
- Developed customer segmentation, scoring, and ranking models using feature engineering and normalized metrics to prioritize high-value accounts.
- Delivered interactive Tableau dashboards adopted by business stakeholders for targeted outreach decisions, improving decision turnaround by enabling self-serve analytics.

Summer Research Intern | IIT Gandhinagar, Ahmedabad, India | May 2024 - July 2024

Project: Two Higgs Doublet Model Exploration [[Github](#)]

- Engineered and processed 25 high-dimensional datasets (500K rows each) for particle physics parameter constraint simulations, applying data balancing and feature engineering on imbalanced data.
- Designed a neural network with regularization and dropout, achieving 15% accuracy improvement over baseline models in parameter constraint prediction.
- Produced research reports with statistical visualizations, contributing to domain expertise in data-driven scientific research.

EDUCATION

1.B.Tech in Computer Science and Engineering (2022 - 2026)

Kalinga Institute of Industrial Technology, Bhubaneswar, Odisha, India
CGPA: 8.96

2.Class XII (2021) – St. Xavier Secondary School, Birgunj, Parsa

GPA: 3.33

3.Class X (2019) – Maisthan Vidyapith Ma. Vi., Birgunj, Parsa

GPA: 3.65

PROJECTS

1. InsightFlow AI | Multi-Agent Analytics Platform [[Streamlit](#)] [[GitHub](#)]

Python, LangGraph, LangChain, Pandas, Matplotlib/Seaborn, Streamlit, LLMs, ReportLab

- Built an autonomous analytics platform using LangGraph and LangChain that converts raw datasets into visualizations, business insights, and executive reports.
- Designed 8 specialized AI agents for data cleaning, statistical analysis, chart explanation, recommendation generation, conversational analytics, and report writing.
- Enabled natural language querying and custom visualization generation, allowing non-technical users to explore data and derive insights without coding.

2. Personalized AI Assistant (RAG-based Intelligent Agent) [[GitHub](#)] | Python . LangChain . VectorDB . LLMs

- Built a production-style RAG agent integrating multi-source personal data using embeddings, FAISS vector store, and an LLM backend to deliver accurate, context-aware query responses.
- Designed a modular ingestion pipeline supporting PDF, text, and structured data sources; implemented semantic chunking and retrieval re-ranking to improve answer relevance.

PUBLICATION

COVID Image Classification using Xception with Attention Mechanism

2nd International Conference on Circuits, Power, and Intelligent Systems (CCPIS), 2025 [[IEEE](#)]

- Achieved 97.86% accuracy and 96.82% precision on medical imaging dataset
- Applied transfer learning, attention mechanisms, and data augmentation to improve model performance

ACHIEVEMENTS & INTERESTS

- Completed Agile Virtual Experience Program (JPMorgan Chase & Co.), gaining exposure to team collaboration, agile workflows, and communication in a corporate setting.
- IEEE published first author at undergraduate level.
